

NOTICE

HYDRANT FLUSHING - WATER MAIN CLEANING

Routine flushing of Rockwood and Hamilton Drive water main distribution system will commence April 17th, 2018 with expected completion by the middle of May.

Roadside signs will be placed in the local area where the flushing crews are working. Once an area has been completed it will be identified on the Township's website (www.get.on.ca).

Water softeners or other filter systems should be placed on bypass to avoid excessive amounts of iron or manganese passing through the media filter. If possible, leave systems off during the advertised flushing timeline (April 17 through to approximately May 18th).

Prior to hydrant flushing, we recommend that you fill a clean container with tap water for drinking and cooking and store this container in your fridge.

Residents may experience temporary instances of discoloured water during the program. It is recommended that residents wait until the water runs clear before consuming water. If discoloured water is noticed, please wait 2 hours to allow for the sediment to settle before running cold water tap (not hot) for a short period of time until the water runs clear. Removal and cleaning of the tap screen may also be required.

Should you have any questions, please contact our Water Wastewater Division at (519) 856-9596 ext. 122.

Thank you for your cooperation and patience.
